AMERIPOLISH OIL EATER

Oil Eater is a biologically derived process for removing oil based stains.

PRODUCT DESCRIPTION: Ameripolish Oil Eater is an environmentally synergistic way of removing oils from surfaces. It can breakdown and consume oil based materials from multiple surfaces while absorbing odors. Oil Eater is 100% biologically driven and is therefore extremely safe for the environment.

It is perfect for removing oil stains and fuel residues from parking lots, garages, warehouses, manufacturing plants, airports, food processing, restaurants, schools, fire stations and municipal facilities.

Oil Eater is also safe to use with all Ameripolish Colors, Sealers and Stain Protectors. After oil or stains are gone, follow standard cleaning procedure recommended by manufacturer.

Oil Eater can also be used to remove oil stains from fabrics without hurting color or breaking down the fabric itself.

USES: Ameripolish Oil Eater can be used on multiple surfaces such as cementitious materials, fabrics, carpet, wood, metal and most common substrates. It is designed to consume and breakdown oil and oil based materials.

Oil Eater continually work on breaking down oil based materials until it is washed away. It can continuously work for days on stains, breaking down the oils and consuming them.

This product works most efficiently at temperatures above 55F°. Colder temperatures do not destroy the ability of oil eater to breakdown oils but will significantly slow down the process.

FEATURES:

- Environmentally safe and synergistic.
- Consumes & breaks down oil vs. just dissolving it.
- No harsh acids or bases or solvents that can cause irritation.
- Reduces or removes odors.
- Can be shipped as non-hazardous material.
- Easy application with a sprayer.
- 100% biodegradable.
- VOC Compliant

PRODUCT SPECIFICATIONS:

Coverage (1 Gal.) 400-600 sq.ft.
Application: Dilute and spray as directed
Color: Clear
VOC: Compliant
Shelf Life: 3 Years
Solvent: Water Based

HOW TO USE:

Spray the first application for cleaning concrete, it is always best to use a pressure washer to quickly remove the surface grease, oil, dirt, etc. and the second application lets the TPP1 Microbes penetrate

and attach themselves into the deep down cracks and crevices. The Microbes are still present after cleaning and rinsing the concrete will get whiter over two weeks' time as the Microbes continue to work when the concrete gets damp or wet. Oil Eater is a concentrate that can be diluted depending on the surface.

- Heavy Oil Stains – Dilute 1 part Oil Eater to 4 parts water.
 - Medium Oil Stains – Dilute 1 part Oil Eater to 15 parts water.
 - Light Oil Stains – Dilute 1 part Oil Eater to 25 parts water.
 - Fabric Stains – Dilute 1 part Oil Eater to 50 parts water.
- For best results apply a minimum of 2 times.

CLEAN UP: Oil Eater cleans up easily with soap and water. Spray with soapy water to remove material from stain area. Oil Eater continues to work for long periods of time but will wash away with rain.

CAUTIONS: Before using Oil Eater, read the MSDS and instructions for use. Use good hygiene when handling this product. Wash hands and any areas that come into direct contact with this material. Proper eye protection is recommended for all cleaning solutions.

STORAGE:

- Store upright in safe dry place at 40-105F° (4 - 41C°)
- Keep product from freezing
- Keep out of reach of children
- Seal container after use.
- Do not mix with other chemicals

WARRANTY: The information contained herein is believed to be reliable. This information is based on laboratory testing and results. Because of variations in methods, conditions and equipment, each user must test this product to make a judgment of performance. **Applicator is responsible for testing material for effectiveness and performance.** Manufacturer obligation is limited to the refund of purchase price or replacement of material if proven to be defective.

MANUFACTURER: American Decorative Concrete.
