PRODUCT: AMERIPOLISH® SURELOCK REJUVENATING CLEANER

Rejuvenates polished concrete floors and helps maintain gloss. Powered by LiSiO2

DESCRIPTION: Cleanser and stain repellent rejuvenator for polished concrete.

USES: Cleaning diamond-polished concrete and rejuvenating stain repellence of AmeriPolish® SureLock™ Stain Protector finishing treatment. Rejuvenating Cleaner is part of the SureLock™ Color System designed specifically for coloring and polishing concrete floors. This product can also be used to gently clean concrete floors finished with products from other manufacturers.

SUSTAINABILITY CRITERIA: Polished and exposed concrete floors are inherently sustainable because they eliminate the need for applied floor coverings. Exposed concrete floors are very durable, eliminating the need for periodic replacement of applied floor coverings. It provides an easily cleanable floor with low-impact maintenance requirements (dry mop, wash with water or mild cleanser) that eliminates waxing and stripping chemicals, imposing low life-cycle impacts on the environment. Surelock™ Rejuvenating Cleaner is water based and has no VOCs. It is shipped in highly concentrated form to reduce transportation related impacts, packaging, and storage. Reflectivity of polished and high sheen floors may help optimize lighting and reduce illumination-energy consumption. frozen.

SELECTION CRITERIA:

- AmeriPolish SureLock Rejuvenating Cleaner is a mild, pH neutral cleanser for polished concrete floors, specially colored floors.
- Rejuvenates water-repellance of stain protection application, especially in areas that are scratched or worn.
- Does not damage concrete surface (as do acidic cleansers)

- Low-odor, non-flammable, VOC compliant (< 40g/l)

STORAGE AND HANDLING: Keep containers tightly sealed. Do not allow product to freeze, nor use product if it has been.

PREPARATION: Any objects on floor that must be kept dry should be removed from the cleaning area. Sweep surface with a microfiber pad or vacuum to remove grit that could cause scratches.

DILUTION AND COVERAGE: SureLock™ Rejuvenating Cleaner is shipped as a concentrate. Dilute with clean potable water: For Autoscrubber: Mix 30 Oz. Rejuvenating Cleaner concentrate (1 bottle) per 30 gal water. For Hand Mop: Mix 1 oz Rejuvenating Cleaner concentrate per 1 gal water. Coverage is dependent on scrubbing equipment used.

APPLICATION: Equipment: Apply SureLock™ Rejuvenating Cleaner with a mop or autoscrubber. Autoscrubber should be fitted with non-aggressive cleaning tools such as brushes. Do not perform regular maintenance with aggressive pads such as diamond-impregnated pads or other abrasives. Use of aggressive pads will wear away stain protection and may, in time, wear away color from concrete surface. Clean using autoscrubber according to manufacturer's directions. After cleaning, allow to dry before resumption of traffic.

NEXT STEPS: Between cleanings, remove dust and debris with microfiber pad or dry mop. Check wear of floor on a regular basis to determine if Stain Protector needs to be re-applied.

COST: Comparable with conventional dedicated cleansers.

Claims must be made in writing and received within one year from date of product sale to original buyer. Sole remedy shall be replacement of product proven defective. Contact ADC for details of SureLock 10-Year Full System Warranty.

COMPOSITION: AmeriPolish SureLock™ Rejuvenating Cleaner is a water-based concentrate cleanser and stain protection replenisher. It is pH neutral. It is intended to be diluted with water by the user.

PROPERTIES: SureLock™ Rejuvenating Cleaner cleans polished concrete surfaces without damaging concrete or existing Stain Protector applications. It adds repellence to the surface to protect scratches and other normal wear, rejuvenating SureLock Stain Protector application.

First Aid: Ingestion: Induce vomiting by giving 2 glasses of water and place finger down throat. Call a physician. Never give anything by mouth to an unconscious person. Eye Contact: Flush eyes with water for at least 15 minutes occasionally lifting eyelids. Get medical attention. Skin Contact: Immediately remove contaminated clothes. Wash skin with soap & water. If irritation occurs get medical attention.

Inhalation: Remove victim to fresh air. If necessary, use artificial respiration to support vital functions. If adverse effect continues after removal to fresh air seek medical attention.
