

Beautiful floors make people feel better

Including healthcare-facility construction and maintenance professionals! Consolideck® Ultimate Performance and Decorative Performance concrete floors can:

- Lower maintenance costs
- Help get LEED® points
- Promote indoor air quality
- Improve facility appearance

Health Care
Facilities

Laboratory tests show cleaning goes faster and easier on ultra-hard Consolideck® concrete floors. And that saves money!

Easy-application Consolideck® products can contribute toward LEED® points, including Indoor Air Quality Management and Innovation in Design – to name just a few!

Consolideck® lithium-silicate hardener/densifiers, protective coatings and GemTone Stains have been rigorously tested and independently certified as meeting the nation's highest Indoor Air Quality Standards.

Easy-to-use Consolideck® products

LS® (lithium-silicate): Premium hardener/densifier for concrete floors. Improves speed and economy of maintenance cleaning. In laboratory tests, LS improved abrasion resistance more than five times on polished concrete over unhardened, unpolished concrete, and outperformed the top five leading competitors.*

LS/CS® (lithium-silicate/colloidal salts): Economical hardener/densifier and dustproof for concrete floors. Increases hardness, durability and service life of concrete floors. Improves speed and economy of maintenance clean up.

GemTone Stain: 21 water-based, penetrating colors for polished concrete. Safer, and better color-control than traditional solvent- and acid-based stains.

ColorHard: 21 rich, water-based colors, including White and Black, that harden/densify and decorate concrete flatwork in one simple step. Just mix with Consolideck® LS. Palette includes UV-stable colors appropriate for exterior use.

LSGuard®: Glossy sealer, hardener/densifier for steel-troweled, polished and decorated concrete floors. Resists spills and stains, and improves gloss and reflectance at every finish level.

PolishGuard: Glossy protective treatment makes decorative or plain interior concrete floors shine while shielding them from spills and stains. VOC-compliant PolishGuard resists etching from acidic liquids like vinegar and fruit juice.

GuardEXT: Protects outdoor flatwork from penetrating spills and stains, including oily food and automotive liquids, while enhancing appearance with a durable shine. Perfect for colored and other decorative concrete.

LSKlean Super Concentrate: Specialized blend of cleaners and degreasers contains a lithium-silicate hardener/densifier. Specially made to maintain maximum hardness – and cleanliness – of most any concrete floor.

See Product Data Sheets on these and other Consolideck® products for complete application and safety instructions. Visit www.consolideck.com.
