## Gaco Western

Product Data Sheet:

GacoFlex A-17 October 2011 Supersedes 2/07

## GACOFLEX<sup>®</sup> A-17 GACOCRETE ACRYLIC RESURFACER

DESCRIPTION: GacoFlex A-17 is an acrylic polymer which adds strength, adhesion and toughness to cementitious materials.

USAGE: A latex modifier for GacoCrete. This is an overlay system that provides a hard durable surface suitable for the application of most GacoFlex coating systems. GacoCrete is effectively used to repair damaged or worn concrete, weathered plywood and to enhance slope to drain. See application specification GW-13-GC.

APPEARANCE: White, milky liquid.

## APPLIED PRODUCT DATA

Solids content, %:	46 to 48
pH, when packed:	9.5 to 10.0
Specific gravity:	1.059
Pounds per gallon:	8.8
Freeze/thaw stability:	5 cycles
Minimum film-formation	
temperature:	50°F (10°C)

## PACKAGED PRODUCT DATA

COVERAGE: See application specification GW-13-GC.

V.O.C. Zero V.O.C.

PERFORMANCE Cement mortars modified with GacoFlex A-17 exhibit increased tensile and flexural strengths versus unmodified mortars. When ambiently cured, thin sections dry rapidly and exhibit excellent toughness and good adhesion to old concrete and masonry, brick, wood, metals, and many other surfaces. Mortars modified with GacoFlex A-17 have improved chemical resistance.

- STABILITY : One year from date of manufacture in sealed containers. Protect from freezing.
- FLASH POINT: Not applicable.

STORAGE

ADHESION: Modified mortars have excellent adhesion to plywood and concrete. See GW-13-GC.

For specific Safety and Health information please refer to Material Safety Data Sheet.
